

## Glowing Campfire Craft

### Materials for Glowing Campfire Craft

- Clear plastic cup
- Tissue paper in red, orange, and yellow
- Liquid glue (I used Tacky glue because of its thickness, but regular school glue works too.)
- LED tea light
- Twig or thin craft stick
- Cotton balls
- Brown construction paper
- Scissors

### Directions for Glowing Campfire Craft

1. Cut your tissue paper up into little squares (or you can buy precut tissue paper squares).
2. Scrunch up a piece of tissue paper and glue it to the outside of a clear, plastic cup.

Continue until the entire cup is covered. (Some kids liked using the eraser end of a pencil to scrunch up their tissue paper, while others preferred scrunching the pieces into balls.)

3. As your tissue paper is drying, make a marshmallow roasting stick by gluing a **cotton ball** onto the end of a twig or **thin craft stick**.

4. Add some logs to your campfire by cutting strips of **brown construction paper**. Use a brown marker or crayon to add some details to your logs.

Now it's time to set up your campfire! Start by setting up your logs. Place your **LED tea light** on top the logs and then put your tissue paper cup over the light.

Go somewhere dark and watch it glow. It looks just like a real campfire!
