1

Reviewing evidence and feedback on how the curriculum is working in real life for children and young people. This will help us understand what areas we should focus on.

analysing

2

Use the findings evidence and feedback to plan the changes that are needed.
This will involve lots of different people with different experiences to co-design together and test the ideas to make sure they work.

engaging and co-creating

monitor and evaluate in practice

Monitor and evaluate the impact and effect to see if the improvements have made things better – and keep making changes if they are needed as we go! Continuing to listen to people's feedback is really important.

4

sharing, learning and using

Work with co-design partners to build the skills, knowledge and tools needed for teachers and educators to deliver the curriculum across the different places where education is delivered - in local areas and across Scotland.

3

Full review of Scotland's Curriculum once every 10 years
